EXPERIENCE

Software Engineer, AI Systems & Full-Stack

Jan 2025 – Present

Tag-N-Trac

Hyderabad, Telangana

- Designed and built **Relativity AI**, a production Rails/AWS Bedrock assistant that routes requests to product-aware agents and uses a custom semantic DSL to query 21 logistics entities
- Presented results as source-linked summaries, **interactive tables/charts/maps**, downloadable CSV/PDF reports, and emailed full-data CSV exports
- Built **event-driven processing** for Track and Trail that turns tracker, gateway, flight, parcel, and ocean updates into shipment/leg transitions, alerts, tag events, cases, notifications, and webhooks
- Delivered **Etihad Air Cargo** workflows for route deviation, piece-not-on-flight, SHC temperature severity, split shipments, geofence events, shipment synchronization, and cases
- Optimized **FlightAware** API usage to lower third-party costs and improve performance; integrated **Portcast** air/ocean tracking for AWB and container visibility
- Traced **production failures** across telemetry, ingestion, processing, and external APIs, hardening workflows against buffered readings, intermittent connectivity, missing data, and inconsistent responses

Analytics & Cognitive Intern

May 2024 – Jul 2024

Deloitte Touche Tohmatsu India LLP

Hyderabad, Telangana

- Developed and optimized **data-processing workflows** using DataFrame APIs and SQL for efficient data transformation and analysis

PROJECTS

Empathetic AI | *Generative AI, Emotion Recognition, Text-to-Speech*

- Built a three-stage multimodal pipeline that generates personality-aware text, detects emotional context, and synthesizes emotion-conditioned expressive speech

Monocular Vision Collision Avoidance | *Deep Reinforcement Learning, ROS*

- Simulated autonomous drone collision avoidance by combining monocular depth estimation with a Dueling Double Deep Q-Network in ROS and Ubuntu

EDUCATION

International Institute of Information Technology, Naya Raipur

Naya Raipur, Chhattisgarh

B.Tech in Data Science and Artificial Intelligence, CGPA: 8.54/10

2021 – 2025

TECHNICAL SKILLS

Languages & Data: Ruby, Python, SQL, JavaScript, C++; PostgreSQL, TimescaleDB, MySQL

Frameworks & Frontend: Ruby on Rails, Flask, Tailwind CSS, HTML/CSS

AI: AWS Bedrock, Claude, Amazon Nova, OpenAI, LangGraph, LangChain, Ollama, Hugging Face, MCP

Cloud & Tools: AWS, Docker, Git, Linux, REST APIs, Power BI, Figma, ROS

ACHIEVEMENTS

- AWS Certified Cloud Practitioner
- Third Place, OpIn Hacks Hackathon 2023
